

Glass panel series

Component : VMBGP1(W/B) - VMBGP2(W/B) - VMBGP4(W/B) - VMBGPO(W/B)

W = White version
B = Black version

VMBGP1B

VMBGP2B

VMBGP4B

VMBGP1SB (socket not included)

Features : (configure using free VelbusLink)

- Configuration using Velbus PC interface (e.g. [VMB1USB](#), [VMBRSUSB](#)) and free [VelbusLink](#) software
- LED feedback and night orientation
- Different reaction times can be set for each button, 0, 1, 2 or 3 seconds
- Detects long or short press
- Non O-LED versions have multichannel possibility, each short press activates next channel (max. 8)
- Extended day, week and year timers with possible sun (rise/set) synchronization* to simulate button press.
- On board temperature sensor to drive heating or air-conditioning

Glass panels with 1, 2 or 4 touch buttons or O-LED display. Buttons have white LED feedback, also serving as orientation light. Audible click feedback during touch
Very extended timer functions, configurable using [Velbuslink](#).

O-LED display version has 8 pages of 4 buttons or a total of 32 buttons, also includes infrared receiver.

Specifications*

- LED indication for supply and data (at backside)
- mTouch© technology
- Safety glass
- Power supply: 12...18VDC
- Consumption: 18mA (22mA for O-LED version)
- 250 possible addresses
- Uses 1 address per 8 buttons and per temperature sensor (configure using [VelbusLink](#))
- Dimensions: 86 x 86 x 11mm > 4mm glass + 7mm distance to wall
- Depth: 28mm including connector
- *Specifications and functions are subject to modification

Options :

- Mount onto Bticino© frame ([VMBGPFS](#) or [VMBGPFC](#))
- Matching glass panel socket frame [VMBGP1SB](#) or [VMBGP1SW](#)
- [VMB7IN](#) for energy meter monitoring on O-LED panel
- [VMB4IRT](#) infrared transmitter for O-LED version

VMBGP4W

VMBGP2W

VMBGP1W

VMBGP1SW (socket not included)

VMBGPOB

VMBGPOW

O-LED version features also:

- White Graphic O-LED display, each button of each page can have custom symbols or text.
- Scroll through each of the 8 pages to operate up to 32 channels.
- Infrared receiver, to operate 4 of the 32 channel
- Display of clock, temperature and energy consumption (see options)

Use O-LED operation panel, Home Center interface [VMBHIS](#) or [VelbusLink](#) to sync time
